PROJEKTET

GUIDE OM RYSENSTEEN FOR KOMMENDE ELEVER:

På grund af corona er intoaftenen for kommende 1.g elever blevet aflyst. Som skole har vi brug for nye elever når I forlader skolen til sommer. Jeres opgave er at lave en hjemmeside som guider de kommende elever til at vælge af Rysensteen Gymnasium.

I projektet skal I dokumentere

- En beskrivelse af en persona.
- Designvalg på baggrund af persona og eksempler på implementering.
- Brugertest med spørgeskema.
- Overvejelser i forhold til ændringer efter brugertest.

I dag

- Lave grupper
 - 2-3 personer med samme ambitioner
 - Gerne samme klasse
 - Aflevering individuelt link til hjemmeside
 - Layout og indhold må gerne være fælles
- Brainstorm over indhold til hjemmesiden baseret på jeres målgruppe
- I gang med tutorials w3schools.com

Intro til HTML Tutorial med w3schools.com

Visuelle elementer:

- Tekst
- Billeder
- Videoer

Skjulte elementer

- Koder
- Links
- Farvekoder (CSS)

```
<!DOCTYPE html>
<html>
<head>
</head>
<body>
</body>
</html>
```

```
<!DOCTYPE html>
<html>
<head>
<title>Page Title</title>
</head>
<body>

<h1>My First Heading</h1>
My first paragraph.
</body>
</html>
```

My First Heading

My first paragraph.

Regel:

- Tags kommer i par og skal lukkes
- Undtagen fx
for linjeskift

- The <!DOCTYPE html> declaration defines this document to be HTML5
- The <html> element is the root element of an HTML page
- The <head> element contains meta information about the document
- The <title> element specifies a title for the document
- The <body> element contains the visible page content
- The <h1> element defines a large heading
- The element defines a paragraph

HTML Tutorial (35 minutter)

Læs og kig på eksemplere i følgende afsnit. I behøver ikke at kunne huske alt, bare sørg for at kunne finde det frem senere:

- HTML Basic
- HTML Elements
- HTML Attributes
- HTML Headings
- HTML Paragraphs
- HTML Styles
- HTML Formatting
- HTML Comments
- HTML Colors

Tags, som I burde ha' stødt på i modulet

- <!DOCTYPE html>
- <html></html>
- <head></head>
- <title></title>
- <body></body>
- h1>,</h1>,<h2>,</h2>,...
- <a href=<u>https://rysensteen.dk</u>>
 Rysensteen Gymnasium
-
- ,,,,
- attributes (name="value")

- Style: <h1 style = "font-size:60px;"> Tekst </h1>
- <hr>
-

- <tagname style="property:value;">
- <body style = "background-color:powderblue;">
- <h1 style="color:blue;"></h1>
- This is a paragraph.
- Formatting: ,,<sub>,<sup>
- <!-- Write your comments here -->

Lav en hjemmeside i Bracket/Atom.

Siden skal have:

- filnavnet introaftenRysensteen.html
- Titel
- en farvet baggrund
- en fornuftig overskrift, hvor du ændrer font og farve
- en kommentar et sted i programmet
- en paragraf med tekst med fakta om landet
 - hvor du bruger linjeskift
 - fed og/eller kursiv skrift
- en vandret streg et sted

ekstra hvis I har tid

et billed.
